Summary

Recent MCA graduate specializing in Data Science & AI with strong skills in Python, Machine Learning, Artificial Intelligence, SQL, Advanced Excel, Power BI, and Data Analytics. Hands-on experience in data analysis, dashboard development, and machine learning through academic projects and virtual internships. Passionate about transforming data into actionable insights with strong analytical and problem-solving skills.

Skills

Technical Skills: Python, SQL, Advanced Excel, Power BI, Tableau, Streamlit, Machine Learning, AI

Data Visualization Tools: Data Analysis

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn

Reporting Business Intelligence: KPI Reporting, Dashboard Creation (Power BI, Tableau), MIS Reporting
Tools: MS Word, Advanced Excel, Streamlit, GitHub, MS Word

Experience

Data Analytics Virtual Intern

June 2025– July 2025

Deloitte– Forage (Virtual) | Tools Used: Excel, SQL, Power BI

- Analyzed datasets using Excel and SQL to identify trends and generate actionable insights.
- Created interactive dashboards and reports in Power BI for data visualization.

Projects

Retail Food Price Analysis and Prediction | Python, Streamlit, SQL, Machine Learning February 2026 – May 2026

- Developed an end-to-end machine learning solution to analyze market trends and predict pricing outcomes with improved accuracy.
- Managed large datasets and ensured data accuracy through validation and cleaning processes.
- Automated reporting workflows using Python and SQL to improve efficiency.

Online Retail Sales Analysis | Excel, ML, Python, SQL, Tableau Public

December 2025 – January 2026

- Analyzed 7,000+ retail transactions to evaluate sales performance and customer behavior.
- Calculated key KPIs including 3.1M+ total revenue, 7,000+ orders, and 450+ average order value.
- Developed dashboards and reports to track business performance metrics.
- Utilized Excel and SQL for data tracking, reporting, and operational insights.

Safe Guard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XG Boost, SHAP

May 2026 – June 2026

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data).
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

Certifications

- Data Analytics Job Simulation – **Deloitte (2025)**
- AI Analyst, Machine Learning with Python, Python for Data Science, NoSQL & DBaaS – **IBM (2025)**

Education

Master of Computer Application (Data Science & AI)

2024-2026

Babu Banarasi Das University, Lucknow

Percentage: 73.4

Bachelor of Computer Application

2021-2024

Ambalika Institute of Higher Education, Lucknow

Percentage: 71.7
