Summary

Recent MCA graduate specializing in Data Science & AI with strong skills in Python, SQL, Advanced Excel, Power BI, and Data Analytics. Hands-on experience in data analysis, dashboard development, and machine learning through academic projects and virtual internships. Passionate about transforming data into actionable insights with strong analytical and problem-solving skills.

Skills

Technology Stack: Python, SQL, Core JAVA, OOPs Concepts, Operating System, Machine Learning, Artificial Intelligence, MS office, Streamlit, JSON, AI Tools, APIs

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch, OpenCV

Data Visualization Tools: Advanced Excel, VLOOKUP, HLOOKUP, XLOOKUP, Pivot Tables, Power BI, Dashboard, KPI Reporting

Development Tools: GitHub, VS Code, Git

Analytical Abilities: Data Analysis, Exploratory Data Analysis (EDA), Revenue Tracking, Business Analysis, Predictive Analytics, Insight Generation, Data Management, ETL Concepts, Reconciliation, Process Improvement, Automation

Experience

Generative AI Virtual Intern

Feb 2026– March 2026

IBM Developer Skills Network (Virtual) | Tools Used: Generative AI, Prompt Engineering, IBM Skills Network

- Completed hands-on training in Generative AI concepts and practical applications.
- Learned prompt engineering techniques and AI-assisted problem-solving workflows.
- Explored the use of AI tools to improve productivity, content generation, and business use cases.

Projects

Retail Food Price Analysis and Prediction | Python, Streamlit, SQL, Machine Learning February 2026 – May 2026

- Built an end-to-end machine learning pipeline to forecast retail food prices, enabling data-driven pricing analysis.
- Automated data cleaning and reporting using Python and SQL, reducing manual analysis effort.
- Designed interactive dashboards to help users monitor pricing trends across commodities and markets.

Online Retail Sales Analysis | Excel, ML, Python, SQL, Tableau Public

December 2025 – January 2026

- Analyzed 7,000+ retail transactions to identify sales trends and customer purchasing patterns.
- Built KPI dashboards that summarized revenue, order volume, and average order value for faster business reporting.
- Used Excel and SQL to automate data analysis and generate actionable business insights.

Safe Guard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XG Boost, SHAP

May 2026 – June 2026

- Built an AI-powered crime prediction system with 85% accuracy on 100K+ crime records, enabling data-driven crime risk analysis.
- Implemented a scalable ML pipeline for preprocessing, feature engineering, and model optimization to improve prediction performance.
- Developed a React + Flask application with REST APIs to deliver real-time predictions through an intuitive web interface.

Certifications

- Generative AI – IBM (2026)
- AI Analyst, Machine Learning with Python, Python for Data Science, NoSQL & DBaaS – IBM (2025)

Education

Master of Computer Application (Data Science & AI)

2024-2026

Babu Banarasi Das University, Lucknow

Percentage: 73.4

Bachelor of Computer Application

2021-2024

Ambalika Institute of Higher Education, Lucknow

Percentage: 71.7
